**LEUWICO
WIESENFELD, GERMANY**

The premium manufacturer develops first class products for ergonomic and contemporary offices. The continuous further development of tried and tested technologies has resulted in aesthetically sophisticated furniture systems that meet design requirements and also provide office functionality. EKU-CLIPO 26|36 contributes to the success of stylish office fittings with its simple and cost-effective installation and invisible soft close.

EKU-CLIPO 26|36

The Original among the sliding door systems for sideboards and highboards. The technology remains in the back-ground and allows the effect of materials such as wood, glass or aluminium frames to take centre stage.

EKU-CLIPO 26|36 PRODUCT ADVANTAGES

- **Multiple design versions** – Inslide/Mixslide
- **Clever product range** – Broad variety of combinations of fitting parts
- **Sliding convenience** – Smooth and soft running
- **Invisible soft close** – Integrated in running track
- **Tool-less clip-on system** – Convenient height adjustment
- **Swiss Quality** – Tested in accordance with DIN-EN 15706

AESTHETICS, QUALITY AND FUNCTIONALITY FOR THE OFFICE

A stylishly designed working environment that provides a perfect combination of ergonomics, design and functionality sets up the ideal conditions for efficient working. The cabinets and sideboards in the iSCUBE system from Leuwico provide orderly and appealing office environments. An example of clarity and organisation is shown using architectural linearity. Perfectly designed office fittings can be created thanks to a multitude of up-to-the-minute material and colour options.

The requirements of contemporary and high quality office equipment are harmoniously combined using the EKU-CLIPO 26|36 sliding hardware system. The ease of installation using the EKU clip-on system, the clever door height adjustment and the invisibly integrated soft close fill end users and manufacturers alike with enthusiasm.
